Georgetown, USA, May 21<sup>st</sup> 2020

Dear Pierre,

The Covid19 crisis has affected the production of our Exhale factory on many levels (parts supply, frozen production,...)

But now, I want to confirm that our factories are now fully operational again and we will deliver the ordered products very soon.

Our new factory being up and running, I am delighted to say that you will notice a significant improvement on the quality of our fans and motors.

As we discussed, this is the planning of the release of your Next 3 containers :

**Container 1 (390 Fans) : The motors will be available for an airplane pickup on May 30th. The Fans (without motors) are already on the water as we speak (ETA Fos June 24th)**

Container 2 (390 fans) : Available for pick up on June 6th, ETA FOS mid July – to be confirmed by freight forwarder

Container 3 (390 fans) : Available for pick up on July 6th, ETA FOS mid August – to be confirmed by freight forwarder

As promised, we have given priority to Europe for the first 2 containers of 390 Fans. No one else will be served before your European customers.

Thank you for your continued business and support.
